DYSPETMA AND SICK HEADACHE.

T)AIN in the right side, under the edge of the ribs, increases on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for a rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternative with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory accompanied with a painful sensation of having left undone something which ought to have been done. A slight, dry cough is sometimes an attendant. The patient complains of weariness and debility, he is easily startled, his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease, but cases have occurred where few of them existed yet examination of the body, after death, has shown the LIVER to have been ex-

A Popular Newspaper, A Welcome Visitor in Every Home, within the reach of every one.

the reach of every one.

The managers of Ten Poer take pleasure in accouncing the course of this paper upon entering its thrutenth year of existence.

The Poer is known to the people of the west as the uncompromising opponent of wrong and the fearless defender of the wrong and the fearless defender of the right. It has during the presidential excitement, and in the stirring events of this Fall in Chicago and over the whole country taken a position which has gained for it homeands of friends in the loyal people of the Northwest.

It has advocated the success of the Republican party, but at the same time it has in no manner extenuated the faults or errors of those within that party guilty of oversight or transgression. It has never turned aside from what it believed to be the path of duty, nor misled its readers or the public. As in the past, so in the latter, it. Power will be found in politics to favor the earrying out to the letter the Constitutional Amendments that were the outgrowth of the war; and of such legislation as will restore this country to prosperity had fluancial soundness, without too, suddenly or arbitrarity shocking its industrial pursuits.

It helieves the Republican party is capable of doing that, and will continue to support while it housely endeavors to fulfill its pledges.

In matters affecting the local welfare,

ble of doing that, and will continue to support it while it honestly endeavors to failfil its pledges.

In matters affecting the local welfare, The Post has been in advance of all Chicago contemporaries in detending the risks of the people and speaking out against official wrong-doing.

Its course in the past is just suffainted to the public that it will maintain the same course in the future.

In all its departments The Post will be emphatically a newspaper; and while being a daily roflex of svents, it will nevertheless maintain a character for decency and good taste that will make it an acceptable visitor in every well-ordered home. Its columns will be purged of every indecency, and no money can or will buy any of its apase for the praise of any illegitimate or immoral calling.

In order to neet the necessities of the times, the prices of The Post have been fixed at the following rates which makes it by far the chaepast newspaper in the Northwest:

MERRILL & BARTLETT'S Water-Puritying Rubber Bucket Chain Pump.

And is prepared to furnish said Chain Pumps on short notice.

The advantages of this Pump over many others are many. The Chain being button-less, it is much lighter, consequently it is not liable to break, and works much easier. The RUBERN BUCKLIN which are attached to the Chain will not wear the Tubing, consequently it will last longer than when Metal Buttons are used. It is, positively ANTI-FREEZING. It is a positive W AITE-FIERLER, as each Bucket is const uctor with an AIR CHAMBER, which carries is given quantity of pure air into the with the first body of water, purifying and cleaning and rendering it it for use.
